

ARTHUR ENGINEERING, INC.

Warehouse Projects

*Consulting Electrical
and Control Systems
Engineers*

Arthur Engineering, Inc. (AEI) has over 45 years of experience providing electrical and control systems design for warehouses of all sizes, many associated with our winery and food processing clients. We have a reputation for personalized attention to the individual needs of every warehouse project, which has resulted in long-term relationships throughout the industry. Some of the services we can offer at your warehouse facility include:

- Main service design and utility coordination
- Medium and low voltage power distribution systems design
- Ventilation/cooling power distribution and control systems design
- Energy-efficient lighting and lighting controls design
- Title 24 Compliance calculations and documentation
- Custom motor and pump control design
- Front office power distribution and lighting design
- Load flow, coordination, and short circuit studies
- Future expansion planning for electrical power and control systems
- Standby electrical power generation system design
- Solar power supplementation and distributed generation interconnection design
